

MOHAMMAD FAHAD ALSHEHRI

CORPORATE HSSE MANAGER | HSE & RISK LEADERSHIP | GIGA-PROJECT SAFETY GOVERNANCE

Riyadh, Saudi Arabia • +966 56 446 6617 • moh2025@hotmail.com • Saudi National • linkedin.com/in/mohammedfalshehri

PROFESSIONAL SUMMARY

Corporate HSSE Manager with 15 years of progressive experience directing health, safety, and environmental governance across some of Saudi Arabia's most complex giga-projects, including the Holy Mosque Third Expansion in Makkah and the Diriyah Gate Development Authority. Proven record of building and embedding HSE management systems, driving zero-harm performance, and leading multi-contractor workforces of 10,000+ personnel to sustain zero-Lost-Time-Injury results. Delivered 200+ million safe man-hours without a Lost Time Injury across landmark projects, led HSE teams of up to 60 professionals, and built a digital HSSE Command Center (SharePoint and Power BI) for real-time performance assurance. Advanced expertise in risk assessment, ISO management systems (45001, 14001), incident investigation, contractor governance, and regulatory compliance. Recognized for developing high-performing HSE teams and aligning safety strategy with Saudi Vision 2030. MSc-qualified with PMP, NEBOSH IGC, and Lead Auditor credentials.

CORE COMPETENCIES

HSSE Leadership & Governance: Corporate HSSE Strategy • Safety Culture Transformation • Client-Side & PMC HSE Governance • Zero-Harm Programs • Executive HSE Reporting

Risk & Compliance: Risk Assessment & Mitigation • Hazard Identification (HAZID) • Regulatory Compliance • HSE Legal Advisory • Control Verification

Management Systems & Auditing: ISO 45001 • ISO 14001 • Integrated Management Systems (IMS) • HSE Audits & Inspections • Lead Auditing • Nonconformance Management • Digital HSSE Systems (SharePoint, Power BI)

Incident & Emergency Management: Incident Investigation • Root Cause Analysis • Emergency Preparedness & Response • Crisis Management • Organizational Learning

Contractor & Operations: Multi-Contractor HSSE Oversight • Contractor Performance Assurance • Construction & Brownfield Safety • Permit-to-Work • Site Inspections

Project & People: Project HSE Planning • Stakeholder Engagement • HSE Training & Development • Team Leadership & Coaching • KPI Development & Monitoring

PROFESSIONAL EXPERIENCE

DAN-PIF Company

Riyadh, Saudi Arabia

Corporate HSSE Manager | Jan 2025 – Present

Tuaja Projects, Al-Ahsa & Al-Madinah | Client-Side HSSE | Project Value: SAR 1 billion

- Direct client-side HSSE leadership and governance across a SAR 1 billion brownfield development (201 villas), embedding corporate and regulatory HSE standards across all construction and operational phases.
- Initiated and established the company's HSSE Management System for DAN from scratch — authoring the complete framework of HSE policies, procedures, and manuals and standing up the HSSE Command System — institutionalizing corporate safety governance across all projects and operations.
- Lead HSSE performance for a 24-month program spanning 2 main contractors and 16 subcontractors, with a peak workforce of approximately 1,400 personnel — surpassing 2 million safe man-hours with zero Lost Time Injuries (LTI) and counting.
- Establish and enforce corporate HSSE policies, standards, and assurance processes, integrating HSE requirements into project planning, procurement, and execution.
- Govern contractor HSSE management systems through structured monitoring and performance reviews, driving leadership accountability and timely corrective action.

- Lead hazard identification, risk assessment, and control verification to prevent high-potential incidents across brownfield activities.
- Direct incident reporting, investigation, and organizational learning, converting findings into preventive controls and measurable risk reduction.
- Develop HSSE performance indicators and executive-level reporting that inform senior management decision-making.
- Lead and develop a direct team of 3 HSE professionals, strengthening accountability and technical capability across the client-side HSSE function.
- Designed and built a bespoke digital HSSE Command Center on SharePoint, integrated with Power BI, providing stakeholders real-time visibility of inspections, incidents, permits, and corrective actions.

JLL (Jones Lang LaSalle) Saudi Arabia

Riyadh, Saudi Arabia

Senior HSE Manager | Sep 2022 – Nov 2024

Project: Diriyah Gate Development Authority (DGDA) | Project Management Consultancy (PMC) | Project Value: SAR 4 billion

- Delivered HSE governance and assurance on the Diriyah Gate Development Authority (DGDA) program (SAR 4 billion) — DGCL Package 1C — achieving 30 million safe man-hours with zero Lost Time Injuries and earning formal client and government appreciation.
- Produced operational HSE performance reports and analytics, tracking leading and lagging indicators and driving data-based improvement recommendations.
- Led incident reviews and investigations of significant events, delivering full root-cause reports with corrective recommendations to project and regional HSE teams.
- Delivered 95 HSE training sessions and achieved 100% induction completion across the project, strengthening frontline competence and safety awareness.
- Facilitated workshops on critical site activities and trend analysis, ensuring client safety requirements were in place before work commenced to prevent progress delays.
- Led a direct team of 4 HSE professionals across inspection, assurance, and reporting functions.
- Completed approximately 2,500 site inspections and 2 formal audits, achieving a 93% corrective-action close-out rate and a 92% client HSE audit score.

Dar Al-Handasah Consultants (CSC)

Makkah, Saudi Arabia

HSE Projects Manager | May 2013 – Sep 2022

Projects: Holy Mosque Saudi Third Expansion, Mataf Project & First Ring Road Project | Project Value: SAR 200 billion

- Directed HSE management across the Holy Mosque Third Expansion, Mataf, and First Ring Road projects (SAR 200 billion) — among the largest and most sensitive construction programs in the Kingdom — accumulating approximately 200 million safe man-hours and earning formal appreciation from the Ministry of Finance (MOF).
- Led and developed an HSE team of up to 60 professionals across multiple work fronts in a high-density, high-footfall pilgrimage environment.
- Served as the designated HSE competent person and principal liaison with consultants, government authorities, and professional bodies, providing technical and legal HSE advice.
- Implemented and maintained the project HSE Management Plan, driving attainment of HSE targets and objectives across the project lifecycle.
- Chaired monthly HSE committee meetings and delivered performance data and safety-improvement plans to senior management.
- Led HSE audits, risk assessments, and workplace inspections, issuing recommendations and ensuring contractor mitigation measures were implemented.
- Performed root-cause analysis and managed close-out of nonconformances, strengthening organizational HSE learning.

Krimmily Contracting Company

Jeddah, Saudi Arabia

Safety Engineer | Dec 2011 – Apr 2013

Project: NWC Home Connections Project

- Delivered site-level safety engineering on the National Water Company (NWC) home-connections project, conducting inspections and enforcing safe systems of work across active civil works.
- Identified field hazards and implemented corrective actions to protect the workforce and maintain regulatory compliance under a documented risk management plan.

KEY ACHIEVEMENTS

- Accumulated 200+ million safe man-hours without a Lost Time Injury across the Holy Mosque expansion program and 30 million LTI-free man-hours on DGDA Package 1C — both recognized with formal client and government appreciation.
- Designed and deployed a bespoke digital HSSE Command Center (SharePoint and Power BI), delivering real-time HSSE visibility and automated executive reporting.
- Sustained zero Lost Time Injuries (LTI) across a 24-month, 1,400-person multi-contractor brownfield program through client-side HSSE governance and risk-based controls.
- Designed and delivered HSE awareness training to 150+ engineers across the Dar Al-Handasah HSE and construction teams on the Mataf project, raising site-wide safety competence.
- Led HSE and environmental awareness programs for contractors and subcontractors during the COVID-19 pandemic, implementing Ministry of Health protocols that safeguarded the workforce and sustained project continuity.
- Built and mentored a pipeline of early-career HSE professionals through a structured development and coaching program aligned with Saudi Vision 2030, strengthening organizational HSE capability.
